

February 2026

Balanced Portfolio

Is this right for you?

This portfolio would potentially be suitable for someone looking for the potential of long-term returns to beat inflation and provide some additional growth on top whilst being happy with moderate short-to-medium-term volatility in the returns. The investor would need to accept the potential for capital loss.

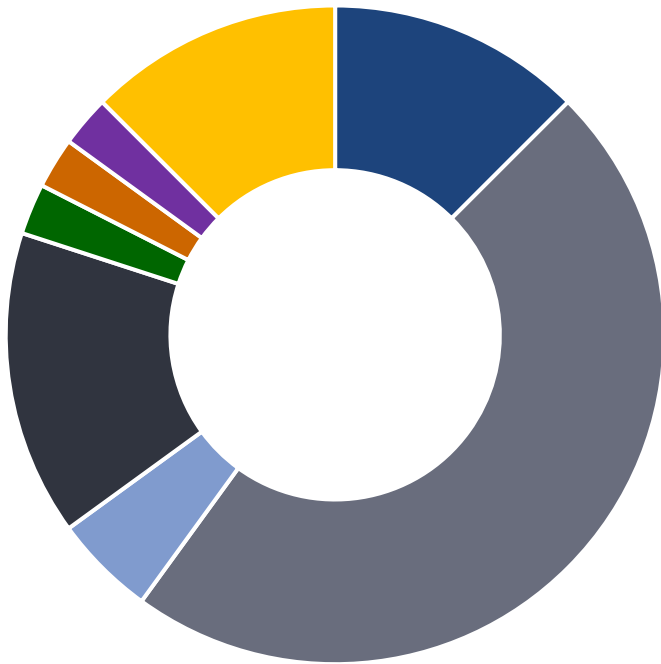

Investment Approach

The portfolio utilises a core-satellite approach investing 80-90% of the funds into low-cost passive funds with the remaining 10-20% in active investments for alternative positions.

Our approach to managing the passive element of the portfolio is to make asset allocation decisions dependent on the global economic outlook.

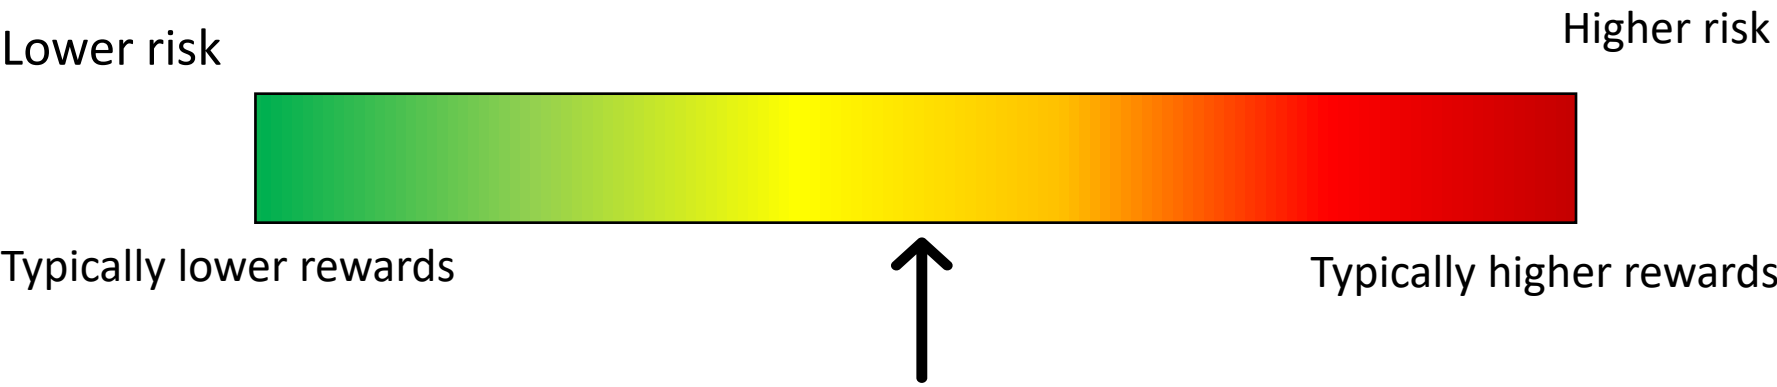

The MSCI PIMFA benchmarks series consists of five composite indices designed to represent the weightings and show returns of selected multi-asset-class strategies, determined by the PIMFA Private Investor Indices Committee, the MSCI PIMFA Balanced benchmark aims to represent an investment strategy of a client seeking a balanced approach between income and capital growth in their portfolio.

Asset Allocation

	UK Equities	12.5%		Inflation-linked bonds	2.5%
	International Equities	47.5%		Cash	2.5%
	Government bonds	5.0%		Real Estate	2.5%
	Corporate bonds	15.0%		Alternative	12.5%

Portfolio rating

The risk rating of a portfolio is determined on the asset types it invests in.

Equities are typically higher risk yet typically provide a higher return. While bonds are typically lower risk though providing a lower return over the long term.

Please note: all asset allocations and returns provided in this document are valid as of 28th February 2026.

5 Year cumulative performance

Discrete performance

Time period	Portfolio Total returns	Benchmark Total Returns
28/02/2025 – 28/02/2026	+13.45%	+12.31%
28/02/2024 – 28/02/2025	+12.15%	+8.23%
28/02/2023 – 28/02/2024	+8.34%	+6.2%
28/02/2022 – 28/02/2023	-0.26%	-2.05%
28/02/2021 – 28/02/2022	+8.68%	+4.33%

The returns in the above graph and table are simulated historical returns based on the asset allocation and weighting of the Daintree Wealth Management Core Balanced portfolio against the ARC Sterling Steady Growth PCI Benchmark from 28th February 2021 to 28th February 2026.

The above table provides discrete yearly performance in one-year blocks from the 28th February 2021.

As they are based on benchmark returns, they are therefore exclusive of charges.

This data is valid as of the 28th February 2026.

February 2026
